

[illegible]

The graph displays pressure drop characteristics for the 1000 Series. The y-axis represents pressure drop in bar/psi, with values 69/1000, 138/2000, 207/3000, 276/4000, 345/5000, and 420/6000. The x-axis represents flow in L/min (gpm), with values 0, 18.9 (5.0), 37.9 (10.0), 56.8 (15.0), 75.8 (20.0), 94.7 (25.0), and 113.6 (30.0). There are two sets of curves: an upper set for 1000 Series and a lower set for 1000 Series. The upper set of curves starts at approximately 276 bar/psi at 0 flow and increases to about 345 bar/psi at 113.6 L/min. The lower set of curves starts at approximately 138 bar/psi at 0 flow and increases to about 207 bar/psi at 113.6 L/min.
